Summary

Fullstack web developer specializing in MERN stack architecture with 1+ years of experience. Highly effective and independent problem-solver. Proven leadership and project management capabilities in previous roles, as well as successfully implementing company-wide policies and productivity systems in a startup. Commended for independence, decisiveness, and meticulous problem-solving. Driven by need for career change, and a desire to reach my full potential in a technical field.

Accomplishments :

- Passed Hatchways fullstack project interview with minimal backend experience, received excellent feedback.
- Built 10+ active projects with a wide array of technologies, both alone and on open-source teams.
- Developed a system for coordination of monthly maintenance for 50+ commercial irrigation systems, involving an average of 15 employees, from the ground up. Successfully maintained and improved the system for 3 years.

Skills:

- Careful state management with pure functions
- Component based architecture
- Understanding of deeper Javascript concepts like closure, prototypal inheritance, and function/object composition
- UI / UX and user-centered design
- Consistent documentation style with JSDoc
- 100% responsive and cross-browser design
- Fullstack debugging with understanding of the JS engine and runtime
- Performance considerations for UX and emissions, often in regards to the React render cycle, or API consumption
- RESTful API best practices
- Integrating and familiarizing myself with a new codebase in a timely manner
- Understanding of git collaboration workflows

Experience

Supervisor
BlueH2O Irrigation
2017 - 2020 (4 years)
Melbourne, FL
- Maintenance coordination of 50+ commercial irrigation systems
- Planned, proposed, and coordinated projects for commercial contractors and residential customers, including administration and follow-up service
- Designed new irrigation systems
- Diagnosed field issues, including low and high voltage electricity, buried cable fault locating, centrifugal pump repair, electrical timers, plumbing, and locating water leaks
